ABOUT ME

Passionate and results-driven **MERN Stack & Next JS Web Developer** with a Bachelor's in Computer Science. Skilled in building dynamic, responsive, and user-centric web applications using **MongoDB, Express.js, React.js, Next.js** and **Node.js**. Proficient in full-stack development, RESTful APIs, and database design with hands-on experience in delivering scalable digital solutions. Committed to clean code, performance optimization, and continuous learning to stay ahead in the web development landscape.

WORK EXPERIENCE

FULL STACK DEVELOPER - MERN STACK | NEXT JS – CLICKMASTER – 05/2022 – 02/2025 – ISLAMABAD, PAKISTAN

- Develop responsive, modern user interfaces using **Next.js, React.js, JSX**, and styling frameworks such as **Tailwind CSS** or **CSS Modules**.
- Build modular, reusable components aligned with React's component-based architecture.
- Implement scalable state management solutions with **React Hooks, React Query**, or **Redux**.
- Configure client-side routing with React Router for seamless navigation and page transitions.
- Design and manage dynamic, validated forms using **Formik** and **Yup**.
- Integrate frontend with backend systems by consuming **RESTful APIs** via **Axios** or **Fetch**.
- Enhance application performance through lazy loading, code splitting, and memoization strategies.
- Engineer secure and scalable RESTful APIs using Node.js and Express.js to manage business logic and data processing.
- Implement robust authentication and authorization with **JWT** and **bcrypt**.
- Structure APIs with Express Router, leveraging middleware for logging, validation, and error handling.
- Validate requests using express-validator or Joi, ensuring data integrity and centralized error management.
- Handle file uploads and static asset serving with **Multer**.
- Model **MongoDB schemas** with **Mongoose**, applying validation rules, indexes, and relationships.
- Execute efficient CRUD operations and utilize **.populate()** for relational data queries.
- Ensure clean, maintainable code with environment configuration files and support smooth **CI/CD deployment** via GitHub Actions, **Render**, or **Vercel**.
- Conduct comprehensive testing of APIs and UI using **Postman, Swagger, Jest**, and **Supertest**.

FULL STACK DEVELOPER - MERN STACK | NEXT JS – FIVERR – 06/2025 – Current

- Delivered custom **MERN Stack & Next JS** web applications for international clients.
- Developed responsive frontend interfaces using **React.js, Next.js, JavaScript**, and **Tailwind CSS**.
- Built scalable backend systems with **Node.js, Express.js**, and **MongoDB**.
- Integrated **RESTful APIs, authentication systems** (JWT), and **third-party services**.
- Customized **eCommerce, CRM, accounting**, and **management systems** according to client requirements.
- Fixed bugs, optimized application performance, and improved website responsiveness.
- Collaborated with clients throughout project lifecycles, ensuring timely delivery and client satisfaction.
- Maintained high-quality code standards using **Git, GitHub**, and **modern development practices**.

FULL STACK DEVELOPER - MERN STACK | NEXT JS – UPWORK – 06/2025 – Current

- Designed and developed full-stack web solutions for **startups, small businesses**, and **entrepreneurs**.
- Created reusable React components and implemented efficient state management using **Redux Toolkit** and **RTK Query**.
- Developed secure APIs with **Express.js** and **Node.js** following industry best practices.
- Managed MongoDB databases, schema design, data validation, and optimization.
- Implemented role-based **authentication, authorization**, and **secure payment integrations**.

- Participated in requirement gathering, project planning, testing, deployment, and maintenance.
- Delivered scalable applications with focus on performance, security, and user experience.
- Provided ongoing technical support and feature enhancements for existing client projects.

● PROJECTS

MOH Capital Overseas - A Multi-vendor Ecommerce website

- Developed a comprehensive B2B agricultural marketplace and export management platform for domestic and international trade.
- Built modules for product listings, seller onboarding, buyer management, export inquiries, and order tracking.
- Implemented role-based authentication and authorization for administrators, sellers, and buyers using JWT.
- Developed responsive user interfaces with React.js and Tailwind CSS to ensure seamless user experience across devices.
- Created RESTful APIs using Node.js and Express.js for managing products, users, certifications, and business operations.
- Integrated contact management, inquiry handling, and lead generation systems to streamline communication between buyers and sellers.
- Developed content management features for company profiles, certifications, blogs, FAQs, and partner information.
- Designed MongoDB schemas for agricultural products, export records, seller profiles, and customer interactions.
- Implemented secure form validation, file uploads, and data management for certification and compliance documentation.
- Optimized application performance and scalability to support growing domestic and international marketplace operations.

Link <https://www.mohcapitaloverseas.com/>

Customer Relationship Management - CRM

- Developed a full-stack CRM platform using React.js, Node.js, Express.js, and MongoDB to streamline customer relationship management.
- Designed and implemented modules for customer data management, lead tracking, sales pipeline monitoring, and task scheduling.
- Built secure authentication and role-based authorization using JWT to control access for administrators, sales representatives, and managers.
- Developed RESTful APIs for customer records, communication logs, sales activities, and reporting functionalities.
- Created interactive dashboards with real-time analytics to track customer engagement, sales performance, and conversion rates.
- Implemented advanced search, filtering, and reporting features to improve data accessibility and decision-making.
- Optimized database queries and application performance to handle large volumes of customer and transaction data.
- Integrated email notification and follow-up management features to automate customer interactions and improve workflow efficiency.

HMS - Hospital Management System

- Developed a comprehensive Hospital Management System using the MERN Stack to digitize healthcare operations and patient management.
- Built modules for patient registration, appointment scheduling, doctor management, billing, inventory tracking, and medical record management.
- Designed secure role-based access control for administrators, doctors, receptionists, and patients using JWT authentication.
- Developed RESTful APIs for managing patient records, prescriptions, appointments, and billing processes.
- Implemented real-time appointment scheduling and status updates to improve operational efficiency and patient experience.
- Created responsive dashboards for monitoring hospital activities, patient statistics, and resource utilization.
- Designed MongoDB schemas for efficient storage and retrieval of patient, staff, and inventory data.
- Improved system reliability through validation, error handling, and secure data management practices while ensuring scalability for future expansion.

Clicksy - A buffer Website

- Developed a social media management platform inspired by Buffer using React.js, Node.js, Express.js, and MongoDB.
- Built functionality for scheduling and publishing posts across multiple social media platforms from a centralized dashboard.
- Implemented a drag-and-drop content calendar to simplify content planning and campaign management.
- Developed post queuing and automated publishing features to maintain consistent social media engagement.
- Created analytics dashboards to track post performance, audience engagement, and content effectiveness.
- Integrated secure user authentication and role-based access control using JWT.
- Designed responsive user interfaces with React.js and Tailwind CSS to ensure seamless cross-device accessibility.
- Optimized API performance and database operations to support scalable content management workflows.

Ecommerce Hub - Shopify Clone

- Developed a full-featured eCommerce platform inspired by Shopify using the MERN Stack.
- Built modules for product management, inventory tracking, order processing, customer management, and sales reporting.
- Implemented secure authentication, authorization, and user role management for administrators, vendors, and customers.
- Integrated payment gateways and checkout workflows to enable secure online transactions.
- Developed customizable storefronts allowing merchants to personalize branding, layouts, and product displays.
- Created advanced search, filtering, and product categorization features to improve shopping experiences.
- Designed RESTful APIs for managing products, orders, customers, and payment transactions.
- Optimized application performance and database queries to support high traffic and large product catalogs.

ErrandBee - Delivery & Task App

- Developed an on-demand service platform connecting users with service providers for errands, deliveries, and task completion.
- Built real-time task booking and management features using React.js, Node.js, Express.js, and MongoDB.
- Implemented secure user authentication and role-based access for customers, runners, and administrators.
- Developed live order tracking and status update functionality to provide transparency throughout task execution.
- Created APIs for task creation, assignment, scheduling, payment processing, and service history management.
- Designed responsive dashboards enabling users to monitor requests, track progress, and manage bookings efficiently.
- Integrated notification systems to provide real-time updates for task assignments, completions, and delivery status.
- Ensured scalability, reliability, and optimized performance through efficient database design and backend architecture.

SKILLS

Next JS | React | JavaScript | Node JS | Express JS | Mongo DB | C# | C++ | React Query | Redux Tool Kit | MySQL | SQL Server | React Native | Git | CSS | Bootstrap | HTML | Github | Postman | TypeScript | PostgreSQL

EDUCATION AND TRAINING

2020 – 2024 Rawalpindi, Pakistan

BACHELORS OF SCIENCE IN COMPUTER SCIENCE PMAS Arid Agriculture University

2018 – 2020 Rawalpindi, Pakistan

INTERMEDIATE IN COMPUTER SCIENCE Steps College

LANGUAGE SKILLS

Mother tongue(s): **URDU**

Other language(s): **ENGLISH**
