ABOUT ME

Passionate and results-driven MERN Stack Web Developer with a Bachelor's in Computer Science. Skilled in building dynamic, responsive, and user-centric web applications using MongoDB, Express.js, React.js, and Node.js. Proficient in full-stack development, RESTful APIs, and database design with hands-on experience in delivering scalable digital solutions. Committed to clean code, performance optimization, and continuous learning to stay ahead in the web development landscape.

WORK EXPERIENCE

 **CLICKMASTER – ISLAMABAD**
FULL STACK DEVELOPER (MERN STACK) – 2022/06 – 2025/08

- Develop responsive, modern user interfaces using React.js, JSX, and styling frameworks such as Tailwind CSS or CSS Modules.
- Build modular, reusable components aligned with React’s component-based architecture.
- Implement scalable state management solutions with React Hooks, React Query, or Redux.
- Configure client-side routing with React Router for seamless navigation and page transitions.
- Design and manage dynamic, validated forms using Formik and Yup.
- Integrate frontend with backend systems by consuming RESTful APIs via Axios or Fetch.
- Enhance application performance through lazy loading, code splitting, and memoization strategies.
- Engineer secure and scalable RESTful APIs using Node.js and Express.js to manage business logic and data processing.
- Implement robust authentication and authorization with JWT and bcrypt.
- Structure APIs with Express Router, leveraging middleware for logging, validation, and error handling.
- Validate requests using express-validator or Joi, ensuring data integrity and centralized error management.
- Handle file uploads and static asset serving with Multer.
- Model MongoDB schemas with Mongoose, applying validation rules, indexes, and relationships.
- Execute efficient CRUD operations and utilize .populate() for relational data queries.
- Ensure clean, maintainable code with environment configuration files and support smooth CI/CD deployment via GitHub Actions, Render, or Vercel.
- Conduct comprehensive testing of APIs and UI using Postman, Swagger, Jest, and Supertest.

PROJECTS

2022/07 – 2022/10
CRM

- Centralizes customer data including contact details, purchase history, and communication records.
- Tracks leads, manages sales pipelines, and automates follow-ups to improve conversion rates.
- Provides insights and analytics for sales, marketing, and customer support teams.
- Enhances collaboration across departments by keeping all customer interactions in one place.
- Boosts efficiency, strengthens client relationships, and drives long-term business growth.

2022/12 – 2023/02
Hospital Management System

- Manages patient records, appointments, billing, staff details, and hospital inventory in one platform.
- Reduces paperwork and eliminates redundant manual processes.
- Ensures accurate record-keeping and compliance with healthcare standards.
- Improves hospital efficiency by automating routine tasks like scheduling and invoicing.
- Enhances patient care through faster services, better data access, and improved communication.

2023/03 – 2023/05

Clicky (Buffer Web App)

- Automates social media scheduling and publishing across multiple platforms.
- Allows recycling of top-performing content for continuous engagement.
- Maintains consistent posting schedules with drag-and-drop ease.
- Provides basic analytics and insights to improve content strategies.
- Saves time for individuals and businesses while ensuring stronger social presence.

2023/04 – 2023/12

Ecommerce Hub (Shopify Clone)

- A customizable eCommerce platform to build and manage online stores easily.
- Includes product catalog management, order tracking, and secure payment integration.
- Offers storefront customization for unique branding and user experience.
- Designed to handle scalability for businesses of all sizes.
- Helps entrepreneurs and brands quickly launch, manage, and grow their online presence.

2024/01 – 2025/03

Errand Bee (Delivery & Task App)

- Connects users with trusted runners for errands, deliveries, and task completion.
- Provides secure access and easy booking for on-demand services.
- Features real-time tracking for transparency and peace of mind.
- Ensures tasks are completed quickly, reliably, and professionally.
- A convenient solution for users seeking time-saving and dependable assistance.

2025/03 – 2025/06

MOH Capital Accounting Software

- Handles expense tracking, invoice generation, stock management, and customer balances.
- Produces financial reports for insights into profit, loss, and overall performance.
- Simplifies accounting processes and reduces manual errors.
- Ensures accuracy, transparency, and compliance in financial management.
- Empowers businesses to make informed decisions and save time on financial tasks.
